Sustainability Management System

PLAN

- Stakeholder engagement
- Gap assessment
- Benchmarking
- Double Materiality
- Impacts, risks & opportunities
- Goal and KPI setting

DO

- Measure and collect data
- Integrate goals into current business operations
- Align people, process, and tools to drive behavior change

CHECK

- Monitor progress toward goals
- Conduct internal audit and management review
- Publish report to present progress towards goals
- Obtain report assurance for third-party verification

ACT

- Evaluate performance via external sustainability assessments (CDP, EcoVadis)
- Use feedback loops to inform operations
- Adjust accordingly to drive continual improvement
